16 feedback charts were handed in.

The work process of Methodenmatrix:

☹☹	☹	😐	☺	☺☺
	1	7	8	

Comments:
- Division into PRD/Dhaka would have been reasonable
- Tired from Theory-WS, unclear aims
- Matrix too strict for an open discussion
- Problem, dass nicht alle in allen Gruppen sein können => Methoden werden evtl. Nicht als wichtig betrachtet und fallen weg

- Some cases no possible solutions…

What did I like/should be done again?
- Open exchange, open and sharing atmosphere
- Good and important: exchange and time frame was good
- Open atmosphere of working groups
- Combination of Theory and YRWS
- PhD-working groups with "matching" topics
- PhD-working groups on Wednesday, more productive than last year
- "Frau Kraas Sprechstunde"
- General asking time
- Time for personal exchange, nicht so output-orientiert, aber Leute haben sicherlich nicht weniger mitgenommen

What should be improved/was missing?
- More preparation (working paper, abstracts, concepts) in written form in advance to the WS
- Material and programme earlier
- More output oriented working groups
- Break between Theory and YRWS
- I am not sure how to deal with the discussions on theory issues
- Working groups don't work very well in my opinion, but 20 presentations wouldn't work either.
